

# Family Engagement Program

*Train your family outreach team members to deliver this research-based program*

The **Family Engagement Program** is a family-centered, trauma-informed intervention designed to engage the parents or guardians of your school or agency teens.

Through **four parent group sessions**, these important adults learn skills to support their child in **mood management, drug-use control, and improving school performance.**

As a research-based program, Family Engagement outlines the important combination of **speaking up, listening, expressing feelings, building self-esteem, and offering needed support.**

**Bonus!** This strength-based model can **substantially boost the outcomes of your Reconnecting Youth or CAST Program**, by instilling support in the home environment for all of the hard work the teens are doing in group.

## Family Engagement Training for Facilitators

Join us for a **lively, cohort-based, online training** to learn how to implement this exciting and supportive program for the parents of your school or agency teens.

This training will teach Family Engagement Facilitators how to:

- **Recruit** parents and guardians to the Family Engagement Program.
- **Conduct meetings** in person or virtually with these important adults.
- **Utilize numerous program resources**, including activity worksheets, an e-book, and meeting evaluation forms.
- **Instill hope and confidence** in the families of teens!

**\$500/each:** Includes curriculum & materials  
**10% off for groups of 5+**
